

Philippe Jeanty, MD, PhD

Philippe was born in Congo, in the middle of the past century. Initially, he was quite small but due to forced feeding developed a syndrome of “failure-to-stop-thriving” which still affects him.

Even very young, his playmates used to complain about his funny accent !

The “Che Guevara” look ...

...and his sweet and supportive wife Thao

Trying to appear like he is actually working !

Education

MD & PhD:

Free University of Brussels, Belgium

Residency & Fellowship:

Yale University & Vanderbilt University

Books (author (2), co-author (4) & contributor (28))

CD/DVD

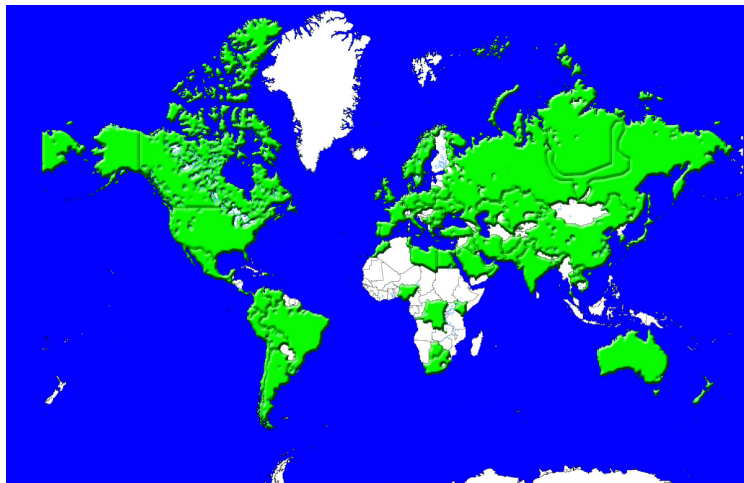

Publications

- 52 Peer-reviewed papers (first author):
- 51 Peer-reviewed papers (co-author)
- 51 Other manuscripts

Dr. Jeanty's fetal growth charts are in every ultrasound machine sold worldwide.
He pioneered air-sonohystero.

Web site: www.TheFetus.net

TheFetus is now a 20-year-old publication, first on paper, then as a web site. It is the largest web site on prenatal diagnosis by ultrasound with over 20,000 images, 600 video clips, 2700 articles, 3000 visitors a day from most of the world (map) and respondents to the case of the week from 61 countries

Courses given (216, red dots), **Lectures given** (over 1000), **Fellows** (39, yellow dots)

Patient's comments

Dr. Jeanty,
Thanks for your genuine care of my wife Amy on our recent visit for an ultrasound of our baby.

Hi Dr. Jeanty,
You may not remember me, but I came in for a consult and amino in May of '09. You were so kind and supportive to me and my husband. You were pretty sure my baby was OK but recommended the amino. You told me to send you a picture of her because she would be perfect. She is perfect!!! She was born on August 31st. We named her Sarah Kate. I attached a picture. Thank you for everything!

Hello Dr. Jeanty.
I wanted to send you an e-mail to say thank you for such a great explanation of our baby's ultrasound. We were the family that came in today September 21st at 8a. We had a discussion about a little bit of fluid being in the baby's kidney. I just wanted to say thank you so much for helping me and my husband understand the situation and also easing my mind. Just wanted to say thank you! Hope that you have a great day!

Hi Dr. Jeanty,

I'm doing great !!! Lo and behold the lower back pain that felt like someone ran a knife in me every time I made a wrong move or even just getting up from sitting on the couch or even when I just walked around, IS GONE. I can hardly believe it. I've had this pain for years and can only assume that I had this cyst for quite a while and that was the cause of it, pushing on some nerve, I guess.

But as soon as the nurse helped me pull up into a sitting position yesterday, after the procedure, I could tell that the pain was gone because that movement was usually excruciating. I hope it or any other cyst won't come back and that the fluid turns out to be just water, and I would be a very happy camper.

Thank you for the great job you did and your kindness and please tell the two ladies also thank you for doing a great job yesterday.

Hi Dr. Jeanty,
Thanks so much for checking in. David and I arrived at labor/delivery early Sunday morning and delivered around 2:57am that night. With the drugs, it was a relatively quick process but pretty intense there at the end. We were able to hold the baby and say goodbye which helped us put some closure on the situation.

little Thatcher weighed 1lb 9oz, was 11 in long - he looked perfectly normal except his head was ever so slightly large and his ears were set a little low, barely noticeable but much like the syndrome indicated. The nurse took some pictures for us if you would like to see them.

There were no complications, and I was able to leave Monday morning around 10am. I am feeling okay, just tired and of course, emotionally drained.

I made sure all the nurses and doctors coming in and out knew that we wanted an autopsy, and if they find out any info to let us know.

Dr. Jeanty, I just want to thank you for your kindness and support, along with your staff's. Being around so many understanding, caring individuals made this much easier on us.

Referring Offices comments

You all are a pleasure to work with, in all capacities. I am a patient, my mother is, we refer everyone to you. There is not enough that can be said to describe your exemplary services! We have the utmost confidence in your diagnosis and genetic counseling. You are the best!

We have always received excellent services from Inner Vision, from staff and physicians.

We are very pleased with everything you and your staff does for us. Always accommodating.

We love you guys !!

Very courteous and easy to schedule appointments.
Love you all !

Everyone at Inner Vision has always been nice and very helpful. Always accommodating for our patients.

You guys are so easy to work with ! Thanks

Web-site user's comments

Thanks for service to mankind by fetus.net. Sir you do not know but lots of people are gaining free knowledge and wisdom in the field of fetal medicine by you. Your work is not less than missionary

I wish to you strong health, success in your many works and jobs:-)), big smile, good mood and greatest holidays !!! And, of course, many thanks to you for

your greatest work on the Fetus.net! Your web-site is only one possibility for me to my professional growth and realization, because I live in small town and work in small usually statement clinic, and my US-scanner not the best. And due to your site I study and grow in my profession.

There is a big sentence in Islam; "if ones teaches me a word, I become his or her slave" The sentence's owner is Muhammad Ali that has come (4th.) after Hz. Muhammad. Teaching, learning is very important in Islam but nowadays some people don't know Islamic reality and they are fundamentalist..

Another sentence, "if the science is in China, you must go to China and to learn...."

One more," the scientists' blood is better than martyr's blood"

Because this reason You are very valuable, precious, worthy, valued (you can choose the correct word for this---:)))

Dear Doctor Jeanty

My name is Marta Florea. I am resident of Department of Obstetrics and Gynecology in Poland. I would like to thank you and your colleagues for the wonderful web site "TheFetus.net". I found this site about one month ago and I fell in love with it at once. It is fantastic, great, amazing! All my English vocabulary is not enough to express my delight. First of all this web site is such a big help for obstetricians, radiologists and young doctors all over the world. I do hope you will not close it on a whim or make it a paid web site.

I dare to write again: thank you very, very, very much.

Dear Dr. John Hobbins

I just wanted to send you a little note to let you know how far your generosity has reached. My husband and I with our three daughters arrived in the USA December of 2007 and immediately were taken in by Dr. Philippe Jeanty . Over the next five months, Jeanty helped us in so many ways that I can not count: housing, Job, Acquiring driver license, internet, great understanding of American way of life, groceries, etc. We had almost nothing and he helped us to get back on our feet. From what I understood, you at one time did the same for him, this in turn, helped me and my family and for that we are so thankful.

All that I learned in this field comes from you and "the Fetus"...a new (the fifth) dimension for Ultrasound diagnostic!

Courses student's comments

WOW! Best course I have ever been to in all the years I have been scanning. Started in 1976!!! Yikes, somebody is getting old! Loved the location. So very relaxing, did not need to go out and "do the town". Felt very comfortable and relaxed during the lectures, did not feel at all overwhelmed and was comfortable asking questions. So relaxing actually learned and retained instead of being bored and tired from partying all night!!! Thank you all for making us feel at home! Way cool dissecting the pig heart too!! So much fun going to Dr. J's home and meeting his wife, such a sweet person! How many women do you know who would invite 120 strangers for dinner??? Please do it again, so many of us need help with those pesky fetal hearts!!!

CD/DVD student's comments

I just finished watching your lecture. It is fantastic! The images and video are the best I've ever seen. You are beyond comparison when it comes to covering the subject matter in a clear and understandable manner, and then illustrating it above and beyond anyone's expectations with your multimedia presentations.

Everything ran smoothly, even on my "antique" 2 year old wide screen monitor. Thank you for giving me the opportunity to view it. I feel honored and I learned a lot.

I recently watched an online video lecture on sonohysterography that didn't come close to matching the information or multimedia content in your lecture.

Bravo!!!

Dear Prof. Jeanty,

Both lectures are brilliant and they radiate common sense (and hard work). I had the opportunity to hear your talk on cardiac drawings in Malaga in 2007 and studied the papers in J Ultrasound Med. There is no doubt that schematic representation of malformations helps recognize an anomaly. It is always easy to say "this heart is not normal", but naming the anomaly is a most difficult task. My patients do not want to know how well I perform fetal ultrasound, they want to know how sick their baby is and what the prognosis is.

The "Cases" lecture enlightens ways of searching for an exact diagnosis and reveals very useful tricks.

There is no need to say that I profoundly admire your work and I thank you for making it available to everyone.
